

NOW HEAR MORE...

...of what you need to hear – and none of what you shouldn't. Our Noise-COM 500 series for active acoustic protection and communication now offer the perfect solution for all working environments and even the most demanding tasks.

Protecting your hearing in noisy environments is critical to safety. But so is being aware of what's going on around you at all times. Being reachable, whether for crucial communication or collegial interchange.

The Savox Noise-COM 500 series has taken leadership in providing acoustic protection and reliable communication in demanding conditions. Now our product family expands with new, unique, innovative features that separate us even more from the competition.

Introducing Savox Noise-COM 520 for Unparalleled Safety

Our newest products complement our offering by adding dual Bluetooth technology to the features already available in other Noise-COM 500 series models. These game-changing advances take on-site safety to a totally new level through:

- 1 Unparalleled Reachability**
Connect two Bluetooth devices for simultaneous two-way radio and for example mobile phone connection. Noise-canceling Push-to-talk boom microphone functionality.
- 2 Unparalleled Usability**
Easy accessible rotary button for push-to-talk and ambient sound volume adjustment
- 3 Unparalleled Reliability**
Built-in rechargeable power unit and electronics protected by the unique casting technique for maximum reliability and ruggedness.

Savox Noise-COM 520XP adds level dependent ambient sound control and established industry profiles for added safety and convenience:

DEFAULT	Setting with frequency range optimized for most noise environments. Amplifies speech frequencies for safety reasons.
NARROWBAND	Limited frequency range for most demanding noise environments. Only speech frequencies are reproduced to the user.
NEUTRAL	Wide frequency range for best situational awareness.

Technical details:

- Bluetooth 5.0 (Dual Bluetooth in Noise-COM 520 versions)
